

Silage/ Grain Trailer – 16 Tonne Specification

Eddie first made silage trailers for himself several years ago as he wanted something that would stand the test of time. Eddie couldn't find what he was looking for so he made his own monocoque shell built on the same principles as his bale trailers.

Our trailers are made from a full sheet of steel top to bottom and come as standard with a hydraulic tailgate, sprung drawbar, air and hydraulic brakes, flashing beacon, galvanised front mesh panel and inspection ladder.

We have used these as an agricultural contractor for the past 10 years and feel that they have been tested to destruction and survived.

The true sign of the quality of the trailer is the demand for the second hand trailers and five years on our trailers have retained over 60% of their value

Staines Trailers is a division of Higheragent Ltd
